

A complete listing of the claims with proper claim identifiers is set forth below.

In the Claims:

1. (Original) A portable food dispenser comprising:
 - a. a first container, the first container having a top opening;
 - b. a lid for the top opening of the first container, wherein the lid is operational between a first position, a second position, and a third position, such that when the lid is in the first position it covers substantially all of the top opening of the first container, when the lid is in the second position it covers only a portion of the top opening of the first container, and when the lid is in the third position substantially all of the top opening of the container is uncovered; and
 - c. a second container, wherein the second container is capable of fitting inside the first container.
2. (Original) The portable food dispenser of claim 1, further comprising a cover for the second container.
3. (Original) The portable food dispenser of claim 2, wherein the cover contains an opening.
4. (Original) The portable food dispenser of claim 2, wherein a portion of the cover can be removed to create an opening in the cover.
5. (Original) The portable food dispenser of claim 3, wherein the cover includes a removable cap that covers the opening in the cover.
6. (Original) The portable food dispenser of claim 1, wherein the first container is formed from a unitary blank of corrugated cardboard.
7. (Original) The portable food dispenser of claim 1, wherein the second container is formed from thermoformed polyethylene.
8. (Original) The portable food dispenser of claim 1, further comprising at least one handle for carrying the portable food dispenser.

9. (Original) The portable food dispenser of claim 1, wherein the lid includes a slot, and the first container contains a tab, and the slot and tab cooperate to secure the lid when the lid is in the second position.

10. (Original) The portable food dispenser of claim 1, wherein the lid is integral with the first container.

11–19 Cancelled

20. (Original) A portable food dispenser comprising:

- a. a container, the first container having a top opening; and,
- b. a lid for the top opening of the first container, wherein the lid is operational between a first position, a second position, and a third position, such that when the lid is in the first position it covers substantially all of the top opening of the first container, when the lid is in the second position it covers only a portion of the top opening of the first container, and when the lid is in the third position substantially all of the top opening of the container is uncovered.

21. (Original) The portable food dispenser of claim 20, wherein the lid is integral with the first container.
